1 Security Architecture Narrative

Here we narrate why our org satisfies the control keys listed in the YML block

2 Double Good Technologies, LP Product Architecture

Describe product architecture here, emphasizing security implications

3 Double Good Technologies, LP Infrastructure

3.1 Product Infrastructure

Describe product infrastructure, emphasizing security measures

3.1.1 Authorized Personnel

- **AWS root account** access is granted only to the CTO and CEO
- **AWS IAM** access is granted to to a limited group of **Operators**
- **Double Good Technologies, LP SSH** access is granted to a limited group of **Operators**
- **Double Good Technologies, LP DB** access is granted to a limited group of **Data Operators**

3.2 IT Infrastructure

Double Good Technologies, LP uses the following cloud services for its internal infrastructure:

- List cloud services

Access to these cloud services is limited according to the role of the Double Good Technologies, LP employee and is reviewed quarterly as well as via regular onboarding/offboarding tasks for new and departing employees.

4 Double Good Technologies, LP Workstations

Double Good Technologies, LP workstations are hardened against logical and physical attack by the following measures:

- operating system must be within one generation of current
- full-disk encryption
- onboard antivirus/antimalware software
- OS and AV automatically updated

Workstation compliance with these measures is evaluated on a quarterly basis.

4.1 Remote Access

Many Double Good Technologies, LP employees work remotely on a regular basis and connect to production and internal IT systems via the same methods as those employees connecting from the Double Good Technologies, LP physical office, i.e., direct encrypted access to cloud services. It is the employee's responsibility to ensure that only authorized personnel use Double Good Technologies, LP resources and access Double Good Technologies, LP systems.

5 Access Review

Access to Double Good Technologies, LP infrastructure, both internal and product, is reviewed quarterly and inactive users are removed. Any anomalies are reported to the security team for further investigation. When employees start or depart, an onboarding/offboarding procedure is followed to provision or deprovision appropriate account access.

6 Penetration Testing

Double Good Technologies, LP commissions an external penetration test on an annual basis. All findings are immediately reviewed and addressed to the satisfaction of the CTO/CEO.

7 Double Good Technologies, LP Physical Security

Double Good Technologies, LP has one physical location, in San Francisco, CA. Key issuance is tracked by the Office Physical Security Policy Ledger. Office keys are additionally held by the lessor, property management, and custodial staff. These keys are not tracked by the Office Physical Security Policy Ledger. Double Good Technologies, LP managers regularly review physical access privileges.

Double Good Technologies, LP infrastructure is located within AWS. Double Good Technologies, LP does not have physical access to AWS infrastructure.

8 Risk Assessment

Double Good Technologies, LP updates its Cyber Risk Assessment on an annual basis in order to keep pace with the evolving threat landscape. The following is an inventory of adversarial and non-adversarial threats assessed to be of importance to Double Good Technologies, LP.

8.1 Adversarial Threats

The following represents the inventory of adversarial threats:

Threat	Source	Vector	Target	Likelihood	Severity
--------	--------	--------	--------	------------	----------

8.2 Non-Adversarial Threats

The following represents the inventory of non-adversarial threats:

Threat	Vector	Target	Likelihood	Severity
--------	--------	--------	------------	----------
